

EARTH SCHOOL

- a temporary human experience •

ROI & Market Opportunity

We are creating a new category.

EARTH SCHOOL is not simply another video game

It combines:

- AAA gaming
- Artificial Intelligence
- Blockchain Infrastructure
- Digital ownership
- Creator economies
- consciousness exploration
- Wellness
- Social MMO gameplay
- Community-owned Infrastructure (DePIN)

No major game today combines these elements into a single player experience.

Instead of asking players to escape reality, EARTH SCHOOL invites them to experience meaningful adventures, build relationships, create value, and grow within a persistent world.

A Massive Global Market

EARTH SCHOOL sits at the intersection of some of the world's largest industries.

Industry	Estimated Global Market
Video games	\$250 B +
Wellness Economy	\$7 T +
Artificial Intelligence	\$1 T + by 2030
Creator Economy	\$500 B +
Blockchain + Web3	Hundreds of billions in ecosystem Value
Personal Development	\$60 B +
Meditation + Mindfulness	\$25 B +

Rather than competing in a single market, EARTH SCHOOL bridges several large and growing markets.

A New Type of Player

EARTH SCHOOL appeals to players who enjoy:

- Cozy games
- Life simulation games
- MMO Communities
- Story-rich adventures
- AI Companions
- Creation and exploration
- Spirituality and mindfulness
- Personal development
- Social collaboration

This creates a potential audience of hundreds of millions of people worldwide.

Growth Roadmap

phase 1 - Community Launch
(Years 1-2)

Target Players: 100,000 - 500,000

Built through:

- Discord Community
- Kickstarter
- creator partnerships
- Early blockchain adapters
- wellness communities
- organic growth

Estimated Revenue:

\$10-40 million annually

Phase 2 - Global Expansion (Years 3-5)

Target players:

1-5 million

Growth drivers:

- Console release
- AI systems mature
- Marketplace Launches
- Sanctuary vehicle experiences expand.
- creator tools
- first expansion worlds.

Estimated Revenue:

\$150 - 750 million annually.

Phase 3 - Platform Growth (Years 5-8)

Target players:

10-20 million

EARTH SCHOOL evolves beyond a game
into a living platform featuring:

- AI-driven NPCs
- Creator-built experiences
- Player-owned digital assets
- Expanding worlds
- Global community events
- Decentralized Infrastructure

Estimated Revenue:

\$1.5-3.5 Billion annually

Phase 4 - THE EARTH SCHOOL Ecosystem (Years 8-10)

Target players:

25-50 million

By this stage, EARTH SCHOOL
is envisioned as:

- a living metaverse
- a creator economy
- a blockchain-powered digital security
- a platform for meaningful play and personal growth.
- a destination for millions of returning players.

Estimated Revenue:

\$4-8 billion annually.

The Blockchain Economy

Blockchain exists to support the player experience - Not define it.

The EARTH SCHOOL ecosystem includes:

- \$EARTH utility token for in-game participation
- player-owned digital assets
- Decentralized creator marketplace
- Community-owned infrastructure (DePIN)
- Cross-world digital identity
- Transparent marketplace transactions
- Reward Systems tied to meaningful participation
- creator royalties through smart contracts
- Community governance for future world expansion.

The technology stays mostly invisible to players while enabling ownership, interoperability, and long-term sustainability.

Multiple Revenue Streams

EARTH SCHOOL is designed as a diversified platform rather than a one-time game purchase.

Revenue may include:

- Game Sales
- optional memberships
- cosmetic items
- AI companions
- Creator marketplace fees
- expansion worlds
- Sanctuary vehicle premium experiences.
- Digital asset transactions
- platform fees.
- DePIN infrastructure services
- Brand Partnerships
- Merchandise
- Licensing
- Educational & wellness experiences.

Long-Term Vision

EARTH SCHOOL is not designed to become the next successful game.

It is designed to become a NEW Kind of digital world - one where entertainment, creativity, AI, blockchain, Community, and personal growth Converge

Its Long-term success will not be measured solely by copies sold, but by the strength of its community, creator ecosystem, and the value generated inside its persistent world.

The next evolution of gaming isn't bigger worlds. It's worlds that help human beings grow - while giving them true ownership of what they create, earn, and experience.

A Living Entertainment Platform

EARTH SCHOOL is where gaming, AI, blockchain, and human Consciousness Converge

Players don't simply level up - they Awaken. Through exploration, meditation, AI-guided activations, meaningful choices, and shared experiences, they expand their awareness while unlocking new layers of the world. As each player evolves, the community evolves, proving that when one of us grows, we all rise together.

The next evolution of gaming isn't about escaping reality. It's about creating worlds that awaken human potential, inspire meaningful connections, and transform entertainment into a shared journey of growth.
